ABOUT ME

Software Programming Technologist with experience in developing web applications and information systems. Specialized in Front-end development with strong foundations in interface design, user experience, Back-end technologies, SQL and NoSQL databases, and cloud service deployment.

Committed to quality, continuous improvement, and achieving business objectives. Recognized for adaptability, teamwork, and results-oriented mindset.

WORK EXPERIENCE

Systems Analyst, Gestión Laboral S.A.S, Barranquilla
aug. 2022 - Present

- Active participation in the development of an Applicant Tracking System (ATS) using Angular for the frontend, Node.js with Express.js for the backend, and PostgreSQL as the database.
- Implementation and deployment of system updates and enhancements in the cloud through AWS.
- Advanced proficiency in Office 365 and Power Platform tools, contributing to the continuous improvement of business workflows.
- Experience in managing SQL Server databases, developing stored procedures, and creating SQL queries for data extraction and analysis.
- Skilled in designing intuitive and functional interfaces, enhancing user experience and interaction with information systems.

FRONT-END DEVELOPER, SENA - Sede TIC, Barranquilla
jan. 2022 - jun. 2022

- Designed and developed user interfaces for the Digibootcamp web application, enhancing user experience through modern styling and responsive design implementation.
- Actively contributed to internal projects focused on educational development, using technologies such as CSS, Bootstrap, PHP, and JavaScript, and improving interactivity through the implementation of modal alerts.
